

EnginZyme

Dr Karim Engelmark Cassimjee (CEO)

Resume

Karim has been active in the forefront of enzyme research for more than a decade; managed research teams and had academic collaborations with AstraZeneca, Cambrex and BASF. His publications and patents describe a variety of topics (enzyme immobilisation, engineering, chemical synthesis, quantum mechanical modelling), and the invention of the EziG enzyme carrier (the basis of EnginZyme). Karim has a PhD degree from KTH Royal Institute of Technology and performed postdoctoral research at the Arrhenius laboratory at Stockholm University. Named KTH Alumnus of the Year 2021.
